PENJELASAN TEKNIS**TECHNICAL NOTES**

1. Sumber utama data kependudukan adalah sensus penduduk yang dilaksanakan setiap sepuluh tahun sekali. Sensus penduduk telah dilaksanakan sebanyak enam kali sejak Indonesia merdeka, yaitu tahun 1961, 1971, 1980, 1990, 2000, dan 2010. Di dalam sensus penduduk, pencacahan dilakukan terhadap seluruh penduduk yang berdomisili di wilayah teritorial Indonesia termasuk warga negara asing kecuali anggota korps diplomatik negara sahabat beserta keluarganya. Metode pengumpulan data dalam sensus dilakukan dengan wawancara antara petugas sensus dengan responden dan juga melalui e-census. Pencatatan penduduk menggunakan konsep usual residence, yaitu konsep di mana penduduk biasa bertempat tinggal. Bagi penduduk yang bertempat tinggal tetap dicacah di mana mereka biasa tinggal, sedangkan untuk penduduk yang tidak bertempat tinggal tetap dicacah di tempat di mana mereka ditemukan petugas sensus pada malam 'Hari Sensus'. Termasuk penduduk yang tidak bertempat tinggal tetap adalah tuna wisma, awak kapal berbendera Indonesia, penghuni perahu/rumah apung, masyarakat terpencil/terasing, dan pengungsi. Bagi mereka

1. *The main source of demographic data is population census, which is conducted every ten years. Population Census has been conducted six times since Indonesia's independence: 1961, 1971, 1980, 1990, 2000, and 2010. The population census enumerates all residents who domicile in the entire territory of Indonesia including foreign citizens except the diplomatic corps members and their families. The method of data collection in a population census involves interviewing respondents and conducting e-census. Enumeration of the population uses the concept of "usual residence", which is the concept of "places where people usually live". De jure was applied to the permanent residents, while de facto was applied to non-permanent residents. The permanent residents were enumerated in place where they normally live, the non-permanent residents were enumerated where they were found by the enumerators, on the night of 'Census Date'. The non permanent residents include homeless people, ship crew, boat people, remote area community, and internally displaced persons. 40. *A person whose expenditure per capita per month is below the poverty line is considered to be poor.*
41. *The Food Poverty Line refers to the daily minimum requirement of 2,100 kcal per capita per day. The Non-Food Poverty Line refers to the minimum requirement for household necessities for clothing, education, health, and other basic individual needs.*
42. *Head Count Index (HCI-P0) simply measures the percentage of the population that is counted as poor, often denoted by P0.*
43. *Poverty Gap Index-P1 measures the extent to which individuals fall below the poverty line (the poverty gaps) as a proportion of the poverty line. Higher value of the index shows that the gap between average expenditure of the poor and the poverty line is wider.*
44. *Poverty Severity Index-P2 describes inequality among the poor. This is simply a weighted sum of poverty gaps (as a proportion of the poverty line), where the weights*

are the proportionate poverty gaps themselves. Hence, by squaring the poverty gap index, the measure implicitly puts more weight on observations that fall well below the poverty line. Higher value of the index shows that inequality among the poor is higher.
